2021 SUMMARY REPORT:

Health Educators
The Public Health Workforce Interests and Needs Survey (PH WINS) was developed by the de Beaumont Foundation and the Association of State and Territorial Health Officials to understand the interests and needs of the state and local governmental public health workforce in the United States, and was fielded in 2014, 2017, and 2021. For more information, visit www.phwins.org.

**Citation:** de Beaumont Foundation and Association of State and Territorial Health Officials, *Public Health Workforce Interests and Needs Survey: 2021 Dashboard*. August 3, 2022.
ABOUT THIS REPORT

This report summarizes key findings about health educators in the governmental public health workforce from the 2021 Public Health Workforce Interests and Needs Survey (PH WINS).

- Key findings are organized by the main sections of PH WINS 2021:
  - Demographics
  - Workforce Characteristics
  - Staying & Leaving
  - Training Needs
  - Engagement & Satisfaction
  - Well-being
WHAT IS PH WINS?

Public Health Workforce Interests and Needs Survey

• PH WINS, a partnership between the de Beaumont Foundation and the Association of State and Territorial Health Officials (ASTHO), was fielded in 2014, 2017, and 2021.

• First and only nationally representative source of data about the governmental public health workforce.

• Supports the governmental public health workforce in understanding their strengths and gaps and informs future investments in workforce development efforts.
2021 METHODS

• PH WINS 2021 was distributed via web survey to 137,446 state and local governmental public health workers:
  • 47 state health agencies
  • 29 big city health departments
  • 259 local health departments

• The PH WINS 2021 instrument had five domains: workplace environment, COVID-19 response, training needs, addressing public health issues, and demographics.

• One important change in 2021: non-permanent employees of centralized state health agencies were included in the nationally representative data set.
WORKFORCE DEFINITION

- Workforce groups are defined by a combination of responses to PH WINS questions on program area, job classification, education, and certifications.

  - **Health educators** include PH WINS respondents who selected the following job classification(s), program area(s), or certification:
    - Job classification: health educator
    - Certification/job classification combination: certified health education specialist working as a disease intervention specialist/contact tracer, population health specialist, program director, program evaluator, public health manager or program manager, or other program staff

*PH WINS respondents were asked to report all program areas in which they currently serve. Workforce groups that are defined using program area include employees who work for the defining program area and may include employees who also work for additional program areas.*
NATIONAL PARTICIPATION

- Nationally, the survey was completed by 44,732 individuals, for a 35% response rate.
- Response rates varied by frame:
  - SHA: 34%
  - Big Cities: 28%
  - Other locals: 52%
    - Locals in Regions V and X*: 56%

*HHS Regions V and X participated in the PH WINS for All pilot programming, recruiting all locals in those regions, regardless of size, to participate in PH WINS.
NATIONAL PARTICIPATION

• Nationally, the survey was completed by 44,732 individuals, for a 35% response rate.

• Response rates varied by frame:
  • SHA: 34%
  • Big Cities: 28%
  • Other locals: 52%
    • Locals in Regions V and X*: 56%

*HHS Regions V and X participated in the PH WINS for All pilot programming, recruiting all locals in those regions, regardless of size, to participate in PH WINS.

Health educators account for 4% of the national governmental public health workforce.
2021 KEY FINDINGS: DEMOGRAPHICS

- PH WINS respondents self-reported demographic (personal) characteristics like their gender, race/ethnicity, and age.

- Respondents also self-reported the highest level of education attained and whether they have a specialized degree in public health.
• 86% of health educators self-identify as a woman.

• More than half of health educators self-identify as Black, Indigenous, and people of color (BIPOC).
DEMOGRAPHICS

- More than half of health educators are between the ages of 31 and 50 years.

### AGE COLLAPSED

EDUCATIONAL ATTAINMENT

• **49%** of health educators have an **advanced degree**.
  * 46% have a Master’s degree.
  * 3% have a Doctoral degree.
• **32%** have a specialized degree in public health.
2021 KEY FINDINGS: WORKFORCE CHARACTERISTICS

• PH WINS respondents were asked a series of questions related specifically to their job and the work they do, including:
  • Supervisory status
  • Job role
  • Primary program area
  • Tenure in public health overall, at their agency, and in their current job.

• Respondents also reported full-time/part-time status and salary information.
80% of health educators work in a **non-supervisory role**.

All staff work in a **public health sciences job role**, which includes program staff, epidemiologists, and contact tracers, among others.
The most frequent program areas among health educators include:

- Communicable disease
- Communications
- Maternal and child health

*PH WINS respondents were asked to report all program areas in which they currently serve. This graph represents only the primary program area - the area in which a respondent spent the most time serving.
More than half of health educators in 2021 had served at their agency for 5 years or less. 9% had served 21 or more years.
2021 KEY FINDINGS: STAYING & LEAVING

• PH WINS respondents were asked a series of questions related to their intent to leave or stay at their agency and whether the COVID-19 pandemic affected their decision.

• Respondents were also asked to select reasons why they intend to stay or leave.
INTENT TO LEAVE/STAY

- **32%** of health educators are considering leaving their organization within the next year.
- **29%** reported that the COVID-19 pandemic impacted their decision to stay or leave.
  - Among those who intend to leave, **37%** said the pandemic impacted their decision (data not shown).

### INTENT TO LEAVE

REASONS FOR LEAVING/STAYING

- Understanding employees’ reasons for leaving is critical for improving recruitment and retention.

- **Top reasons for leaving** among health educators who intend to leave include:
  - **Lack of opportunities for advancement** (reported by 47%)
  - **Work overload/burnout** (reported by 39%)
2021 KEY FINDINGS: TRAINING NEEDS

- PH WINS respondents were asked to rate the day-to-day importance of and their own proficiency with 25-26 skill items, tailored for their supervisory level.

- Skills were collapsed into 10 strategic skill categories.

- A training need is a skill item reported as having high importance, but low proficiency.

- Identifying training needs can help support strategies to produce T-employees, or those who have depth in technical skills and breadth in strategic skills.

The top 5 areas of training needs across all supervisory levels are:

- Budget and financial management
- Change management
- Systems and strategic thinking
- Policy engagement
- Community engagement
The top 5 areas of training needs among non-supervisors are:

- Budget and financial management
- Change management
- Systems and strategic thinking
- Policy engagement
- Community engagement
The top 5 areas of training needs among supervisors, managers, & executives are:

- Budget and financial management
- Systems and strategic thinking
- Policy engagement
- Justice, equity, diversity, & inclusion
- Change management
PH WINS respondents were asked to rate their agreement with several statements related to:

- Job, organizational, and pay satisfaction
- Perceptions about their workplace
- Perceptions about their supervisors
- Perceptions about their organization
Health educators are largely satisfied with their job (80%) and organization (68%).

Half are satisfied with their pay.
PERCEPTIONS ABOUT ORGANIZATION

- Health educators’ overall perceptions of their organizations are positive.
- However, there is room for improvement:
  - A little more than half of the workforce agrees that leadership staff and employees communicate well.
  - A little more than half agree that creativity and innovation are rewarded.
2021 KEY FINDINGS: WELL-BEING

• The 2021 PH WINS survey included questions specifically about employees’ mental and emotional well-being.
WELL-BEING

• 1 in 4 health educators rate their mental health as either “poor” or “fair.”

2021 KEY FINDINGS: HEALTH EQUITY CONCEPTS

The 2021 PH WINS survey asked respondents to rate their level of awareness of and confidence in applying five health equity concepts:

• Health Equity
• Social Determinants of Equity
• Social Determinants of Health
• Structural Racism
• Environmental Justice
HEALTH EQUITY CONCEPTS:
HEALTH EQUITY

• **89%** of health educators rated their awareness of Health Equity as a **lot**.

• **67%** of health educators are **very confident** in applying the concept of Health Equity to their work.
HEALTH EQUITY CONCEPTS: SOCIAL DETERMINANTS OF EQUITY

• **56%** of health educators rated their **awareness** of Social Determinants of Equity as **a lot**.

• **44%** of health educators are **very confident** in applying the concept of Social Determinants of Equity to their work.
HEALTH EQUITY CONCEPTS: SOCIAL DETERMINANTS OF HEALTH

- 85% of health educators rated their awareness of Social Determinants of Health as a lot.

- 68% of health educators are very confident in applying the concept of Social Determinants of Health to their work.
HEALTH EQUITY CONCEPTS: STRUCTURAL RACISM

- 65% of health educators rated their awareness of Structural Racism as a lot.

- 41% of health educators are very confident in applying the concept of Structural Racism to their work.
HEALTH EQUITY CONCEPTS: ENVIRONMENTAL JUSTICE

- 56% of health educators rated their awareness of Environmental Justice as a lot.
- 35% of health educators are very confident in applying the concept of Environmental Justice to their work.
