Public Health Workforce Interests and Needs Survey (PH WINS)

About the Survey

You are receiving this survey because your entire organization has chosen to participate in the Public Health Workforce Interests and Needs Survey (PH WINS) Islands Pilot Program. The information from this survey will be used to inform future public health workforce development initiatives that support recruitment and retention, training, and diversity of the public health workforce. The survey is being conducted by the de Beaumont Foundation in partnership with the Association of State and Territorial Health Officials (ASTHO), and the Pacific Island Health Officers Association (PIHOA). The survey should take approximately 30 minutes of your time. Your participation is voluntary, and your responses will be confidential. We hope you will participate. Your feedback and unique perspective is important to improve the public health worker experience in your organization and across the nation.

Instructions for Completing the Survey

The survey can be completed in multiple sittings, though we do recommend you complete it in one sitting. If you do need to close the survey and resume, your progress will be saved. The survey link is unique to you, please do not share it with others or delegate it. As a reminder, your responses are completely confidential. Clicking "continue" will be interpreted as your informed consent to participate and that you affirm that you are at least 18 years of age.

Need Help?

If you have questions about the survey, please email phwinsislands@debeaumont.org. For answers to frequently asked questions, please visit the PH WINS FAQs webpage. If you have any questions about your rights as a participant, you may contact the WCG Institutional Review Board at 855-818-2289 or clientcare@wcgclinical.com.

Defining Terms

Throughout the survey, the terms agency, department, or organization are used interchangeably to refer to independent state or local public health agencies or a unit/division of public health within a larger agency, often referred to as an umbrella agency or super-agency. Additionally, when referring to a supervisor, manager, or executive, please use the following definitions:

- Supervisor: responsible for employees' performance appraisals and approval of their leave, but do not supervise other supervisors
- Manager: work in a management position and supervise one or more supervisors
- Executive: member of Senior Executive Service or equivalent

In this survey, we will use several terms specific to public health practice. In several questions, we have provided definitions in hover over text. You will see these terms displayed in blue. If you hover your mouse over them, the definition of that term will appear (pictured below).

☐ Injury/Violence Prevention	
☐ Non-Communicable Disease/Chronic Disease	
Communicable/Infectious Disease HIV	Including cancer, diabetes, heart disease, obesity, etc.

Thank you, we couldn't do this work without you!

The questions on this page are designed to verify your employment at your agency. Your personal information will not be shared with your employer. All data will be reported in aggregate form, with no identifying details included. If you have any questions, please reach out to us at phwinsislands@debeaumont.org.

Please select your agency.

Section VI: Modules

Module I: Epidemiologists

You are receiving the following questions because you indicated that your job role is an Epidemiologist or one of your program areas is Epidemiology Surveillance.

- 1. Please select the epidemiology tier that best describes you.
 - O **Foundational:** Those completing academic programs or are early in their public health career still gaining training or applied experience on the job. These individuals require supervision when performing most tasks.
 - O Intermediate: Those who administer epidemiology programs and projects often independently. These individuals may require supervision while managing larger or more complex programs or projects and other tasks.
 - O **Practiced:** Those with subject matter expertise or who manage epidemiology programs and resources which may include finances and personnel. These individuals perform their duties independently and may supervise others on a project basis or all the time.
 - O Advanced: Those who typically hold senior positions within organizations, demonstrate leadership, and are visionaries. These individuals require no supervision for their job duties but may supervise and mentor others.
 - O **Does not apply:** I work in administration and/or do not consider myself to practice epidemiology. [If selected, skip to end of section]
- 2. [Show the corresponding skills based on response to question 1 (e.g., Foundational → Column 1)]
